

# Nature

The Nature range has been inspired by the forces of nature, due to our desire to mirror the strength, elegance and timelessness of the elements they provide us: minerals, metals, wood, earth.

Based on this idea, the squeezers of the Nature range let materials and colours take centre stage. Neutral, restrained and smart materials and colours which transmit those sensations in the establishments where the juicers are installed, giving them a higher, both real and perceived, high end quality.

## Z14 Contactless

### Endless possibilities for your business

We launch our first line of countertop juicers with a built-in cashless payment system: Z14 Contactless. With this product, Zummo offers a juice extraction solution for those places interested in a complete payment solution and remote secure terminal for unattended automated machine operators. This is a concept that especially adapts to corporate offices, convenience stores, co-working spaces, etc.

- New digital control plate (bin counter, acoustic warnings, standby,...)
- Cashless payment system integrated into the machine.
- Payment system compatible with PULSE protocol.

Smoky grey front cover

Automatic filter

- **Increased durability:** as there are no elastic belts, there are no breakages, something that could also affect the optimal functioning of the blade.
- **Greater functionality:** avoiding maintenance tasks and replacement of broken or worn belts. Cleaning the kit is also much easier.
- **Greater yield:** the new kit leads to greater juice extraction yield. Thanks to its new design, up to 10% more juice can be obtained.

Cashless

## Technical features
